

CA Internet Security Suite Plus 2008

CA Internet Security Suite Plus 2008 provides comprehensive protection against Internet threats that can jeopardise your privacy and diminish PC performance. It also helps ensure your important files, photos, music, and PC settings are safe, by letting you easily back them up, restore them, or transfer them to a new PC.

Anti-Virus

Protects against viruses, worms and Trojan horse programs

Anti-Spyware

Protects against a wide range of spyware threats

Personal Firewall

Stops intruders, blocks malicious programs, and helps protect your personal information

Anti-Spam

Makes sure you get messages from people you know, while redirecting messages from people you don't

Anti-Phishing

Protects you from phishing attacks, Internet fraud attempts, and malicious websites

Parental Controls

Allows you to control and manage Internet access for the whole family

Data Backup and Transfer

Helps you backup and restore your important personal data and PC settings, or transfer them to a new PC

Free Updates, Upgrades, Local Support

With free daily security updates, plus free upgrades to the latest product features, your one-year subscription helps ensure you're up-to-date and protected from the latest threats.

Free 24/7 online support, plus access to our rich knowledge base and online tools. Free phone support also available during normal business hours.

Customer Care & Technical Support

Australia 1300 364 750
New Zealand 0508 807 062

- One or more POP3 or MAPI email accounts

Also supports data migration from Windows 95, Windows 98, Windows Me, and Windows NT 4.0

CA Internet Security Suite Plus 2008

Distinctive Features

CA Internet Security Suite

- **User-Friendly Interface** offers simplicity and superior ease-of-use, helping you quickly and easily set preferences, check program status, and maintain a secure PC
- **Low System Overhead** with a total install of only 150 MB and low usage of system resources, CA Internet Security Suite Plus installs quickly, saves hard drive space, and scans efficiently
- **Certified by Independent Testing Organisations** West Coast Labs, Virus Bulletin and ICSA Labs for effective virus, spyware and firewall protection

Anti-Virus

- **Automatic Email Scanning** protects against viruses that arrive via email, before they can cause damage
- **Scheduled and On-Demand Scanning** allow you to run a scan at any time, or schedule scans at pre-selected intervals to meet your needs
- **Real-time Scanning** proactively stops viruses by scanning files when they are opened, closed or saved to your PC
- **Daily, Fully Automatic Updates** easily and effectively address the #1 reason PC users suffer attacks: out-of-date signature files

Anti-Spam

- **Blocks Unwanted Spam** by allowing only messages from your approved senders list to reach your Inbox - other mail is quarantined for you to review later
- **Protects Multiple Email Accounts** for all of your Microsoft Exchange and any POP3 mail accounts you have configured in Outlook
- **Integrates Seamlessly with Microsoft Outlook/Exchange** with easy access to all features directly from the toolbar in Outlook and Outlook Express

Personal Firewall

- **Pre-loaded Security Settings** give you optimal protection right out of the box, and reduce firewall warnings for known programs
- **Application Control** informs you when programs attempt to access the Internet, and lets you allow or deny access
- **Automatic Network Detection** identifies your network adapter and the addition of new network adapters, to help ensure proper protection for your local network or router configuration

Anti-Spyware

- **Comprehensive Spyware Detection and Removal** provides comprehensive protection against a wide range of spyware, adware, keyloggers, browser hijackers and other threats
- **Real-time Protection** detects and removes spyware running in memory, and helps prevent spyware from making malicious changes to the Registry

Anti-Phishing

- **Helps provide protection against fraudulent and malicious websites** by showing you who owns the site you are visiting, warning you when you're accessing a potentially unsafe site, and providing you with an easy-to-understand risk assessment
- **Browser Toolbar** shows you the physical address of the owner of the site you're viewing, and provides the appropriate risk assessment and rating
- **Link Advisor** works within email, instant messenger, web and office applications to show you information about the sites you intend to visit before you even click on them, simply by placing your mouse cursor over the link

Parental Controls

- **Flexible User Profiles** allow you to create and define up to ten user profiles, each with its own password protected login and filtering profile
- **Time Restrictions** allow you to limit the time each user can spend on the Internet on a daily basis
- **Extensive Reporting Capabilities** allow you to easily generate several types of reports on web activity for each user profile

Data Backup and Transfer

- **Backup and Restore** allows you to run scheduled or on demand backups of your PC's 'DNA' (data, settings and preferences), save it to a CD or DVD to protect it from an unforeseen incident, and easily restore it if necessary
- **Data Migration** allows you to quickly stream your PC's DNA directly from your old PC to your new PC using an Ethernet crossover cable; or, create a DNA file to transfer to your new PC
